TROUBLESHOOTING

JOY MAKES

Due to their small size, lighting accessories are susceptible to damage during installation. Common causes of failure include:

Ensure that the connectors are correctly installed as shown in the picture.

Check if the wires are disconnected or broken from the solder joints.

Check the internal pins of the ports on the battery brick. The internal pins of a properly working port should be straight, if the small pins are bent, they may be considered faulty ports.

If you have checked each string of lights according to the guide above and the lights are still not working, please contact our customer service for assistance.

SAFETY PRECAUTIONS

- 1 Before use, verify the voltage to avoid damage to the product and potential safety hazards. The light set must only be powered by a 5V DC (or lower) power supply. Otherwise, the resistors may overheat and burn out, shortening the lifespan of the LED beads.
- 2 The lights in the product are not replaceable. If they are damaged or not lighting up, please refer to the troubleshooting section or contact our customer service for assistance.
- 3 Avoid pulling on the lighting wires as this may cause damage.
- 4 Do not expose the product to water as it may damage the product.
- 5 If the plug does not fit easily into the ports on the board, reverse the direction and insert it again to avoid damage and short circuits, rather than forcing it in.
- 6 Please read and follow the instructions carefully during building to ensure a good building experience.
